Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This variation is to add waste wood shredding and metal removal (using magnets and/or eddy currents) from waste wood, for recovery and disposal purposes. The annual tonnage of waste that can be accepted by the site has been increased to 74, 999 tonnes and hazardous waste codes 16 01 04* end of life vehicles and 16 01 07* oil filters, have been removed.

Management documents have been incorporated into the varied permit in Schedule 1, Table S1.2 to reflect the additional activities of waste wood shredding and metal removal from waste wood.

Pre-treatment of waste for incineration or co-incineration of waste is a newly prescribed activity under the Industrial Emissions Directive. This activity is subject to Section 5.4 of the Environmental Permitting Regulations. Therefore, treatment limits have been included in Table S1.1 of this permit to reflect that the permit has been assessed on the basis that it is a waste facility, and to therefore prevent the site from operating over this threshold, and becoming an installation.

No other changes are made to the permit.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
